SUMMARY

"I am a Passionate Full Stack Web Developer with a strong specialization in the MERN Stack (MongoDB, Express, React, Node.js). My expertise includes advanced technologies like Next.js for modern, server-rendered applications and TypeScript for robust, scalable codebases. I excel in building high-performance, user-friendly web applications, focusing on clean architecture, optimized backend APIs, and efficient data management using PostgreSQL and Neon DB. Proficient in implementing secure JWT authentication and integrating various third-party services, I am dedicated to delivering high-quality, full-stack solutions that drive technical excellence."

WORK EXPERIENCE

★ **Full Stack Web Developer (MERN)**
Self-Employed / FreelanceJuly 2024- Present

- **Modern Full Stack Development:** Successfully developed and delivered scalable, high-performance web applications, leveraging React.js for dynamic frontend interfaces and Node.js /Express.js for robust backend architecture.
- **New Technology Integration:** Seamlessly integrated modern frameworks like Next.js for optimized server-side rendering (SSR) and adopted TypeScript to enhance code quality and maintainability across larger projects.
- **API & Security Implementation:** Designed and built secure RESTful APIs,ensuring data validation and implementing strong user authentication using JWT (JSON Web Tokens) for protected resource access.
- **Frontend Focus:** Created responsive, mobile-first user interfaces using modern CSS frameworks like Tailwind CSS, Focusing on reusable components and clean UI/UX design.
- **Deployment & Optimization:** Handled end-to-end deployment processes using services like Vercel and Netlify, ensuring high application availability and optimizing sites for SEO and performance.
- **Version Control:** Maintained rigorous version control using Git/GitHub, ensuring collaborative coding standards and efficient project tracking.
